

Dear Readers

**in Austria there is an independent news channel called AUF1 TV.
recently there was an interview with Heiko Schoening, a german book author.
for all who don't know him, let me tell you what the special reason, why I am
writing about this today.**

**In the interview, Stefan Magnet, the AUF1 founder, tells the audience about an
interview 5 years ago, with the same Heiko Schoening
where Heiko warned about an upcoming pseudo-pandemic, which he at that time
could not name, but about which he gave a framework:
a pseudo pandemic, coming with lockdowns and forced vaccinations and quite
many of the things we in fact all got to experience in the
following years with "covid" and "corona".
in the recent interview Heiko now gives an outlook based upon his information,
which is roughly this:**

**as corona was a virus based pandemic / scamdemic,
the new "disease x" will be a bacteria based plandemic.
the plan seems to be to let plants produce this bacteria which then shall not only
infect, but kill billions.**

**and, wonder oh wonder, the people who earned billions with corona are now
building factories for the purpose of,
wonder oh wonder, producing plants in greenhouses.
of course, so Heiko, they wont mount a big sign with the letters "bio weapon
factory" on them,
they will come as greenhouses for the production of "genetically manipulated"
cucumbers, tomatoes, salad etc.**

**let me add: the standard business case for a greenhouse is... producing plants
for later selling them in supermarkets.**

**well..
guess what...**

**think of a bacterium, genetically implanted in the DNA of tomoatoes, salad etc,
sold to and in our supermarkets,
landing on YOUR dish, on a daily basis.**

**no matter if you are vaccinated or not, you most probably will get infected and
hurt.**

**this is an EVIL plan.
much more evil even than the vaccination itself.**

and of course they will present a nice and healthy and “100% working” antidot for this stuff.

...which will then most probably kill you even more fast.
(if we learned our lesson from last time...)

so.

what can WE, YOU do about this.

there are indeed several solutions.

**if you have a garden of your own,
do your homework NOW,
buy old seeds for what ever you want to eat.**

**if you have a farmer of trust in your area: talk to him.
build up a relationship to him.
form local networks.**

STOCK THE HELL UP with longlasting stuff/ food!

if you can afford a greenhouse, I would think that this is now the right time to think and perhaps act about it.

if you have access to indoor farming, hydroculture etc... perhaps you better think about it now.

perhaps you can build up local networks with people of same background / knowledge and form a local community for local farming.

**of course there is also the possibility for another solution:
stop eating the stuff from the supermarkets!**

if you want to avoid any risk, then this would be the final option.

**if you ever wanted to try out if you are good for “light food”,
meaning, not to eat anything and get your energy from daylight...
well, then this might be your time now.**

quintessense:

the evil masters do their job on a daily basis, they execute their longterm 30 year plans

**and that means:
they want to earn YOUR money for THEIR poisonous food,
they want to get MORE rich from killing you with your daily meals.**

**as we now hear and read this,
and the information comes from a man who warned us 5 years ago of what would
come
and reading this with the experience from the corona-time we all have
and reading this with all the rest of background knowledge most of us here
have...**

well...

then it seems the time is NOW to do something about it.

**I keep you posted
Thomas**
